# WHO WE ARE:

- **MAGNA TECH ELECTRONIC COMPANY (MTE)**, an international distributor and integrator of professional multimedia systems, designers, consultants, and custom manufacturer.
- We provide our services based on the highest quality standards in over 40 countries across the world. MTE's worldwide headquarters are located in Miami, Florida, USA.
- Through its various affiliates MTE is represented in North, South & Central America, the Middle East, the United Kingdom, Europe, Asia, Russia, CIS countries and the Caribbean.

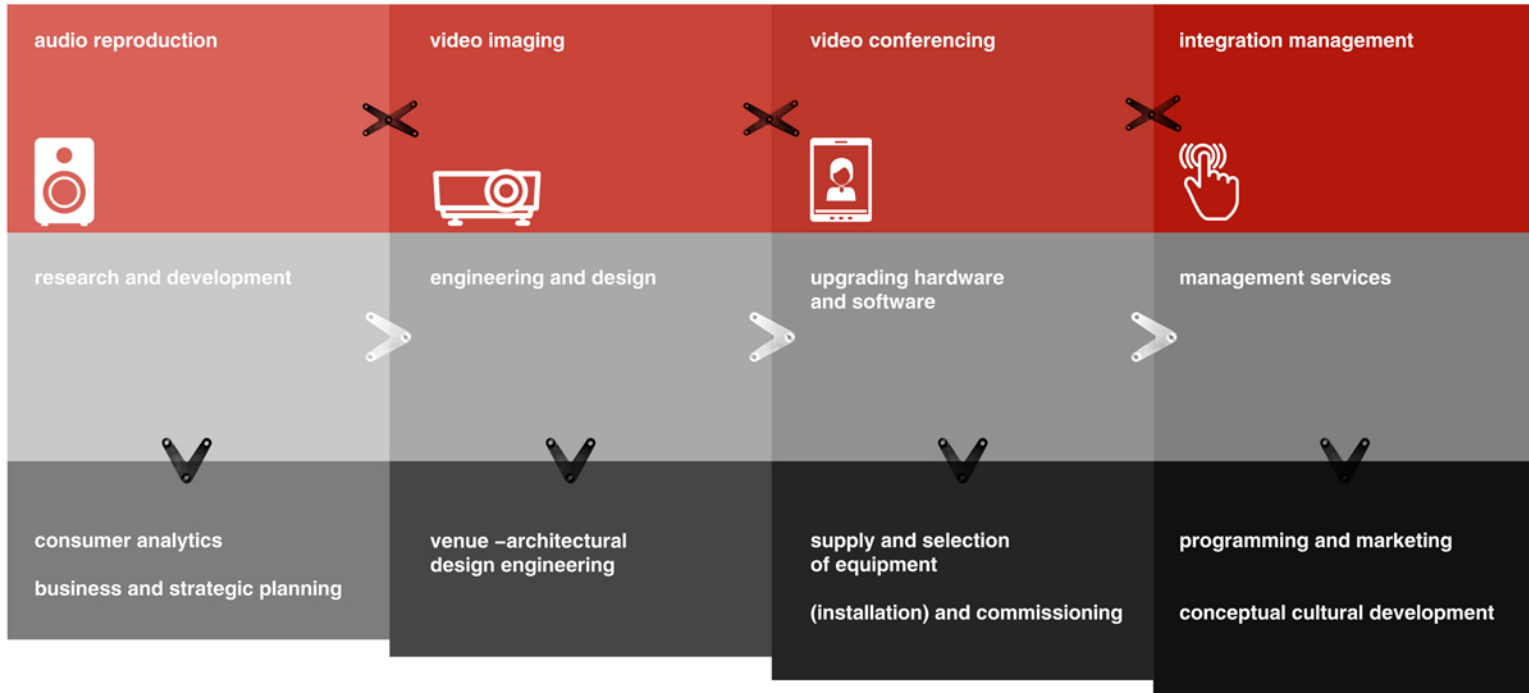

# OUR BUSINESS: Overview

- Our unique solutions ensure the integration of high quality image and sound creating conditions for efficient communication and providing unique experiences for audiences.
- We design, supply, install video, audio, lighting, control, elevating theater stages, venue seating and rigging systems as well as their separate elements making management of such systems as easy and intuitive as possible.
- We collaborate with both for-profit and nonprofit organizations. Our goal is to help build facilities which add to the cultural richness of a community.

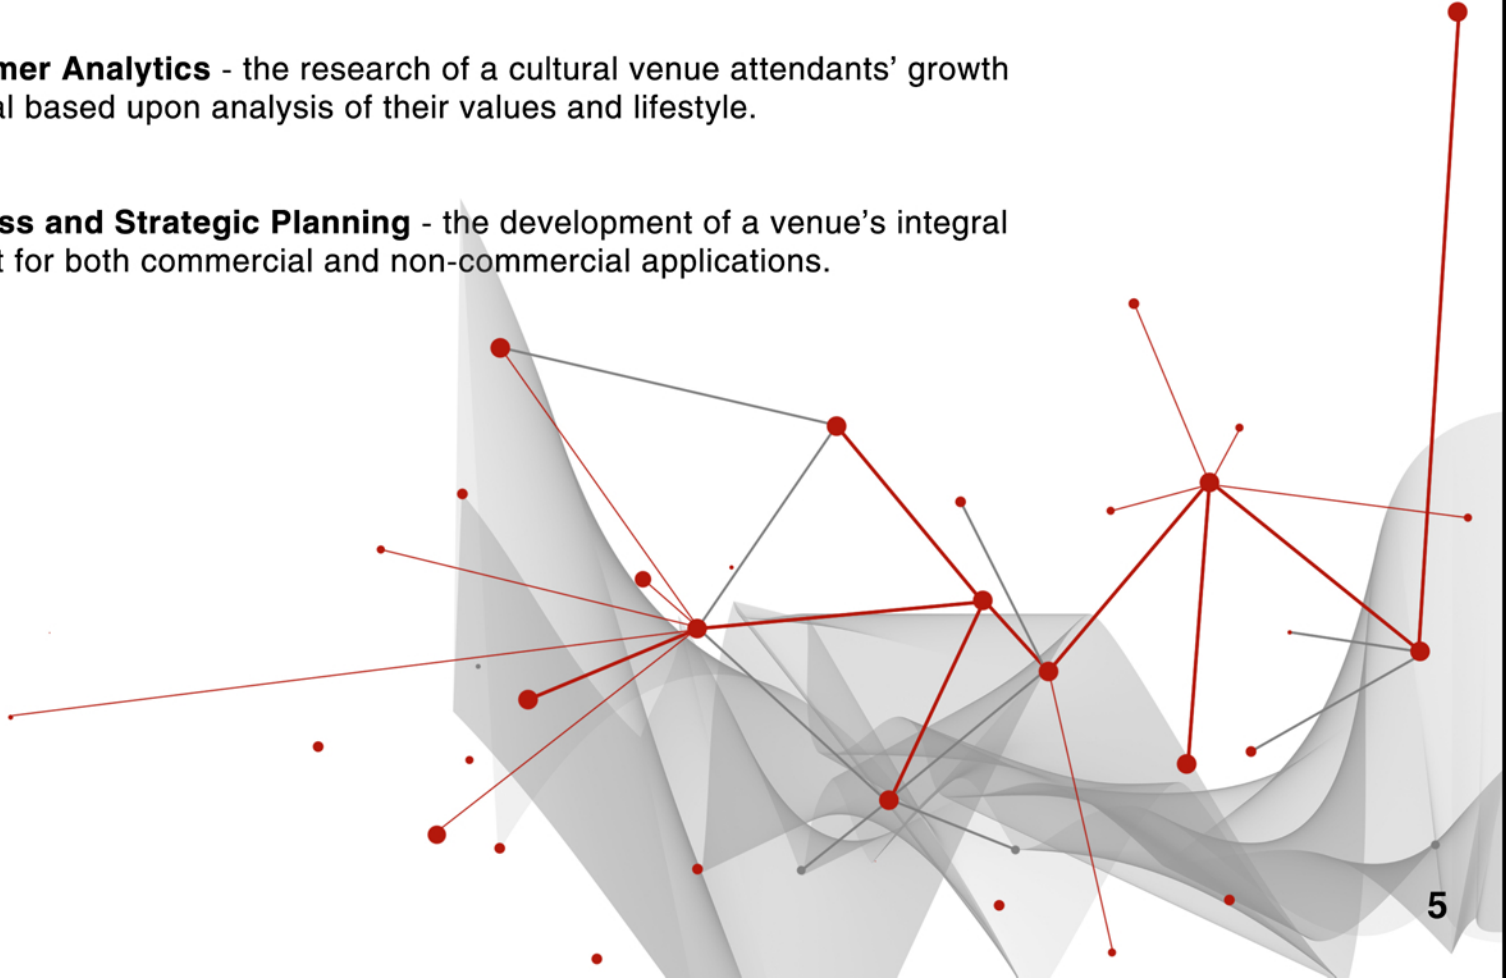

# OUR BUSINESS: Overview

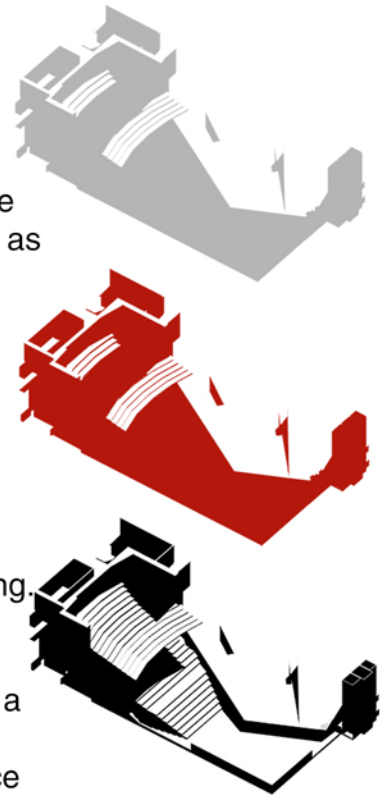

# RESEARCH AND DEVELOPMENT

- **Consumer Analytics** - the research of a cultural venue attendants' growth potential based upon analysis of their values and lifestyle.
- **Business and Strategic Planning** - the development of a venue's integral concept for both commercial and non-commercial applications.

# ENGINEERING

- **Architectural and Construction** - the development of an integrated project implementing construction, architectural, space-planning and technical solutions in collaboration with organizations certified in those specialties.
- **Specialization** - the development of architectural and design solutions to create the best acoustic environment, optimal placement of audio and visual systems, as well as the flow of people's movement in and through both small and large spaces. (Cinemas, museums, planetariums, concert halls, etc.)
- **Interior Design & Development** - creating unique indoor and outdoor design concepts.
- **Mechanical, Electrical & Structural Engineering** - solutions for placing utility systems, power, ventilation, HVAC and lighting, both general and specialized lighting.
- **Tech Design (Multimedia Solutions)** - the development of multimedia systems in a manner to meet today's demands yet be flexible enough to accommodate the fast pace of technological changes. Designs focused to help simplify future maintenance and upgrades.

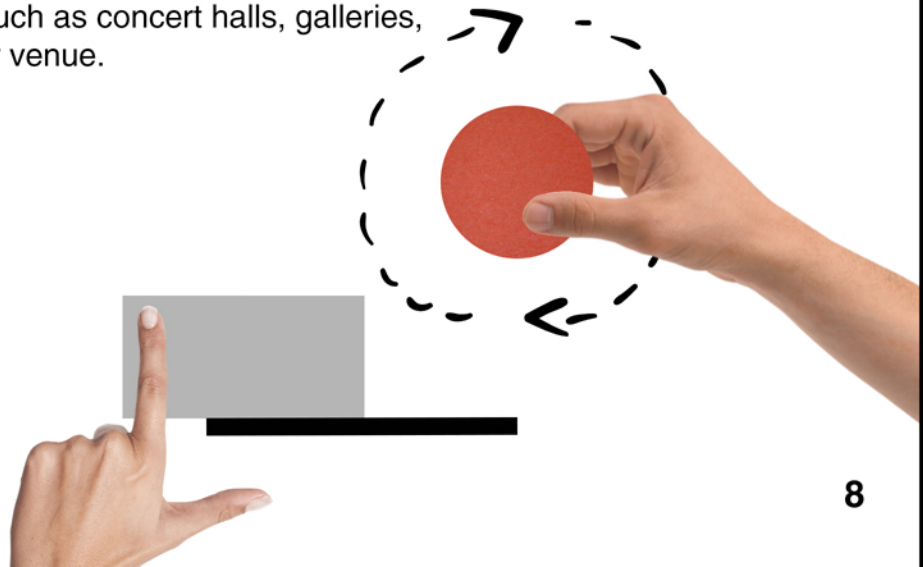

# SUPPLY, SERVICE & SUPPORT

- **Supply** - we source a large variety of quality products from distributors around the world.
- **Installation, training, commissioning and acceptance** - assures the system's integration is fully functional and performs as per the project's requirements. Also ensuring staff are fully trained on the operation and basic maintenance of the system and its components.
- **Integration** - installation of equipment and software solutions that ensure unified management of all AV infrastructure elements and 24/7 monitoring of system performance.
- **Technical support and service** - post-sales check-up of all equipment, consulting, additional staff training as necessary and remote technical support.
- **Modernizations, upgrades and replacement** - includes extensions and additions to existing multimedia complexes. Replacing, restoring and upgrading separate elements of AV equipment and infrastructure. Working closely with clients to identify areas where new technology will improve their current equipment performance.

# MANAGEMENT AND DEVELOPMENT

- **Programming and marketing** - consulting on selection and creation of public programs, movies, live shows and performances. Development of efficient communication strategies with the venue's patrons & visitors before and after the grand opening.
- **Public Space Integration** - the introduction of concepts for both commercial and non-commercial spaces to provide cultural enrichment of the community by focusing on arts, education and entertainment applications. Cultural integration is used to create, place or change a space with elements such as concert halls, galleries, cinemas, museums or libraries inside a particular venue.

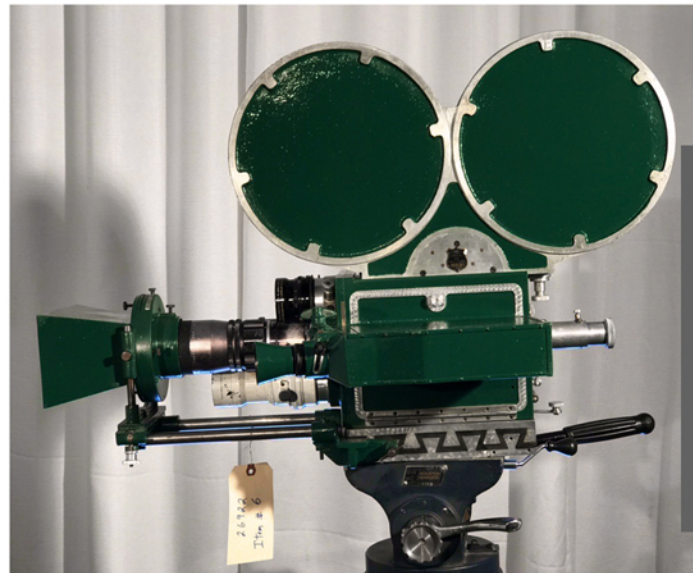

# RESTORATION OF ANTIQUE, LEGACY AND ANALOG FILM & AUDIO EQUIPMENT

**MTE CLASSICS** - company division focusing on restoration, archiving and collectibles. Our restoration team can supply you with targeted themed displays to create new exhibits or supply equipment to supplement or match existing collections and archives. Our technicians take pride in the art of preserving and restoring obsolete and vintage equipment for archiving, display or research.

**MTE CLASSICS COLLECTION** - consists of 10,000+ unique items of early and mid-century production, post-production and projection motion picture equipment (film cameras, projectors, lenses, studio lighting, audio recording devices, amplifiers, speakers, microphones and more).
